Designing: CorelDRAW, Adobe Photoshop, Canva, Blender

Language: Indonesia (Native), English (Advanced)

PROJECTS

[Model Analisis Sentimen Ulasan Aplikasi MySF dengan BERT](#)

September 2023

Model Analisis Sentimen Ulasan Aplikasi MySF dengan BERT is an analysis model developed using Python and BERT method to compile the user's review data of MySF application from Google Playstore and turn them into information containing user sentiments, classified into positive, neutral, and negative categories. This makes it easier for the application developers to understand user sentiment towards the services offered by MySF.

Tech stack: Python, NLK

[TLJ Cargo Management System](#)

January 2023

TLJ Cargo Management System is a web-based goods delivery management system designed to streamline the shipping management process for TLJ Cargo. This project was made by me as the project manager, and three of my friends that works as the back-end developer, front-end developer and documentation staff.

Tech stack: PHP, MySQL, BootStrap, JavaScript, HTML, CSS

Brosur Peralatan Dapur 3D

September 2022

Brosur Peralatan Dapur 3D is an android application developed to assist in the marketing of a company's kitchenware products. It provides information on the marketed kitchenware models utilizing Alternate Reality and 3D technology, along with their specifications and prices.

Tech stack: AndroidSDK, Vuforia, Unity3D, C#, Blender
